The Model DAF-500 AfterFilter can be used with any Hammond Cyclone DusKolector. It has 64 cloth tubes, 5" in dia. These provide 500 sq. ft. of cloth filter area. A motorized device shakes the dirt out of the cloth tubes into the 55 gal. drum below. The shaker automatically operates for one minute each time the DusKolector is turned off. The DAF-500 must be lagged to the floor.

Extra Equipment:
Enclosure for outdoor use which has a vented, weatherproof sloping top. It also has four interchangeable sides — two are hinged doors and two are solid panels. Rust resistant paint is extra. The filtered air can be ducted to return indoors if desired. Adds 4" to height. See below.

SPECIFICATIONS: 64 cloth tubes, 5" dia; 500 sq. ft. cloth filter area; inlet dia 12"; net wt. 1000 lbs.; ship wt. 1450 lbs.
